Zoho Project Tracking Tool:

Zoho is a popular collaboration and task management tool helps you break large, complex projects into smaller, more manageable tasks. And you can also break down those tasks into subtasks, plus create task lists, dependencies, and milestones.

Zoho Dashboard View:

Zoho Projects has multiple views for visualising progress, including Classic, Plain, Gantt charts, and Kanban boards. Development teams can collaborate with the software's chat and email features, plus its forums, feeds, and file sharing. With it, you can list bugs, assign them to specific developers, and track progress.

Zoho Projects features include budgeting and invoicing, integrated timers, a calendar, and timesheets. The software is also customisable in terms of fields, views, templates, statuses, and functions.

Zoho Projects offers some reporting on issues, timesheets, and tasks, and you can use its planned versus actual to avoid exceeding your budget. As far as integrations go, you can extend Zoho Projects' even more by integrating it with third-party apps and Zoho tools, such as Analytics, Desk, and Sprints.

Jira Cloud:

JIRA Cloud is a cloud-based project management and issue tracking platform developed by Atlassian. It offers teams a flexible and collaborative environment to plan, track, and manage their projects efficiently.
